## HOT MIX ASPHALT RELEASE AGENT

**PRODUCT NUMBER 4012**

### RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

### PRODUCT DESCRIPTION:

KO Manufacturing's Asphalt Release Agent is a special blend designed specifically for machines that pour asphalt. By creating a temporary, non-stick, protective surface between the asphalt and the machine applying the asphalt, applications are quicker and build-up of asphalt is prevented. Safe for humans, biodegradable, and non-interfering with the asphalt, KO Manufacturing's Asphalt Release Agent is an excellent way to shorten pour times, increase the life of your machinery, and protect your employees from other release agents that are toxic.

### INSTRUCTIONS:

Dilute 2-4 ounces of chemical per gallon of water. Add to chemical reservoir of foaming machine. Use foaming machine to generously cover surfaces that contact asphalt. Rinse clean with water when finished.

### CUSTOMER BENEFITS:

- Inexpensive.
- Effective at reducing asphalt buildup on machinery.
- Non-toxic and biodegradable.
- Cleans easily.
- Does not interfere with asphalt.
- Concentrated for longer use.

**Attention:** Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.
