Gun/Lance Combo - Two Gun (User Safety)

- The rear entry gun has a snap lock spring that always kicks the trigger into lock position when not in use which protects the user from pulling the trigger by accident. The assembly has a straight trigger gun that would need to be pulled as well to operate and spray. If the operator were to fall, most likely one hand would break away and the trigger gun will stop spraying preventing an accident. The lance features a swivel action so the operator can place it in their own comfort position which can be locked with a set screw to the lance.
- 10.5 GPM flow rate, 3/8" F x 1/4" F, 300° F
- 5000 PSI max. pressure (JA6-00189 Gun Only)
- 4000 PSI max. pressure (Lance Ass'y)
